Money Loaned on Collateral Security

Both the Democrat and the Courier ve put forth conciliatory and liberal ar ticles, in regard to the policy best to be pursued by all Conservatives in Kentucky in the present condition of the country's affairs. Both of those papers strongly counsel harmony of feeling and action between such of the conservatives as supported General Hobson, and sneh of them supported Judge Duvall. We can most cordially unite with them in their good counsel, believing that its adoption is abolut ly demanded by the public good. If those of our people who were disloyal in the war, and those who were loval, can unite together upon the ground of present lovalty and strict conservatism, neither class discriminating against the other in elections, or in any political mov ments or operations, it is in the highest degree important that they should do so. The late conflict ought never to have taken place, and its asperities cannot be too soon buried ont of mortal sight, if the masses of the two parties that were arrayed against each other are alike seeking to advance the best interests of the Union, and alike willing to co-operate honestly and fairly together for the country's good, now and in the future.

If there is co-operation, it must of cours be upon the basis of entire conslity. No Central or other Committee, made up exclus'vely either of those who were for the rebelion or those who were against it, must assume the ordering of political at fairs. There must be liberal and thorough compromise. The true policy, in our oninion, is that the Hobson Conservatives and names of these distinguished gentlemen merely as a matter of convenience should stand and act in full fellowship with each ther npon the platform of the genuine Northern Demeracy. Undoubtedly the Northern Democracy are ready and disposed, upon all occasions, as a body, to rehosts that put down the rebellion, but there is no particular need of such reputhere can be no pressing reason why any of the Kentucky supporters of President electi as with the Northern Democrats. differ with them as they may in regard to South may think about secession, they appreciate the paramount, the infinite

Prussia and France.

The news by the cable is that the demand of Louis Nanoleon upon Prussis for the extension of the frontier of France has been rejected. We have presumed that it would be, for Prussia, so recently triumphant over a first-class power, is in na mood for yielding to unreasonable or questionable demaids.

And now it remains to see how Louis Napoleon will receive the rejection of his demand. No dont, he decided in his own mind, before taking the step, what cours to pursue if Prassia should withstand him We suppose that a war is not improbable, and, if it comes, it will doubtless be bloodier and far longer than the late strug gle between Prussia and Austria. In the event of such a wer, the sympathies of nearly the whole people of this continent will be with Prussia. The Cholfra.—Dr. Bigel w, a hold I physician of Boston, says: "From our past observations I do not believe that cholera, should it appear in this country, will be so likely to trouble New England as it is to visit the malarious regions of the South and West."

Among all the many different remedies advertised there are none that act so completely as an antidote to this malarious poison, and which give vigor and strength, than Dr. Roback's Stomach Bitters and Blood Pills. The Blood Pills net directly on the liver, causing it to throw off the deleterious matter, and the Bitters restore the appartite and invigorate the whole system, thoroughly keeping off the terrible scourge, cholera.

LAWS OF THE UNITED STATES.

Passed at the Pirst Session of the Thirt uluth Congress,

Who is Ristori?

anticipated advent in Acter m Adelaide Ristori, the Italia families, the Marquis Capranica del Grillo, which caused great trou le, and the couple were obliged to separate. The Marquis visited Florence in disguise, and remained there until the family pride r lented, a reconciliation took place through the influence of Cardinal Pecca, and Ristori was taken into the noble family. She left the stage but afterwards volunteered to appear for the lenefit of a poor manager who had been thrown into prison for debt. Three representations were given, and her success was beyond all her prior nehievements. Her genius, however, was destined to reveal itself in its power and glory in the sublimest forms of tragedy, which, up to the year 1s4s, she had only attempted. She made her first appearance in Paris on the 22d of May, 1855, in the character of Francisca di Rimini, and at once became a favorite. Thirty six performances were given during her engage ment, and the receipts amounted to about \$55,009. Her second season in Paris was a repetition of her former triumphs. She then went to England and performed there with equal success. Her repertoire in this country will include all the celebrated characters of the great tragedienne.

The tax-ridden people of Spain ought to be happy. The Queen has set them a gloricus example. She has ordered the tax on her private property to be paid six mentls or ivelve mentls in advance, declaring that "she wishes to share the sacrifices borne by her faithful subjects. This will of course stimulate every loyal Spaniard to discharge his responsibilities from half a year to a year sooner than he might be required to pay them. If the Queen pays her taxes in advance, why should not they?

Death of Mrs. John C. Calholn.—
This year rable lady the relict of Carolina's great statesman, died at Pendleton, S. C., on the night of July 25th. She had lived to see the wise counsels of her illustrious cens it utterly repuliated by the fanatical najority of his countrymen, and to pass through the baptism of blood which her beloved South received as the result of the disregard of his political teachings. Her name is reverted by a loving people, as well for her intrinsic virtues as for her life-long association with the great statesman.—Columbia Patriot.

It is a remarkal le coincidence that the caterpillars which heretofore destroyed the trees and shrubbery during the summer menths have not made their appearance this year, and the same phenomenon cettered in 1849, when the cholera was so fatal.
